

Just getting my plane ready to Fly to EAA Airventure in OshKosh, Wisconsin!

Well, I'm going to see my friends at Matco Mfg at booth 86, right outside of Hangar C.

Oh Cool! Didn't they make the wheels and brakes for [SpaceShipOne](#)?

Yep. They sell wheels, brakes, and components for sport aircraft, UAV's, and spacecraft!

That was them! And if you're lucky when you stop by the booth you'll get a free sticker and tattoo!

Well, don't be a stranger Spencer! I have lots more wheel and brake information to share with you!
